One Thing for Sure . . . It's Pretty Awful

What Can We Expect from the Budget?

At the time of this writing (around noon, Thursday, June 25) legislators were still battling it out in Sacramento trying to reach a compromise on the budget. One thing we know for sure, whatever the final budget, it will be very hard on the state and the UC system. We do not know how heavy the axe will fall once the budget is approved. How it will affect jobs, salaries, enrollments, student fees, and healthcare programs remains to be seen.

There are two competing plans in Sacramento at this moment — a Democratic plan and the Governor's (Republican) plan. The Democratic plan proposes that UC be cut about 10% from the dollar amount received in 1991-1992. It also requires tax increases and a roll over of about $3 billion of the deficit.

The Republican plan cuts UC's budget by approximately 12.5% from what was received in 1991-1992. It calls for no roll overs and no tax increases. It does however, call for deeper cuts in other programs all across the state, which are unacceptable to the Democrats. The cuts include K-12 education.

Salary Cuts

Again, at this writing it seems that no matter what the plan — whether it be one of these two or another alternative — some salary cuts will be inevitable.

How the salary cuts will occur is still under discussion. But, UC salary cuts could follow some variation of those which will affect state employees. The state anticipates cutting salaries by 5% with a deferred repayment plan, maybe to be paid back in 18 months or so.

Whatever budget the state legislators approve, UC will then take its own proposed budget to the UC Regents. Their next meeting is scheduled for Thursday and Friday, July 16 and 17, in San Francisco. Following that meeting, we should know exactly what is happening (if the state has passed a budget by that time). Most likely the effective date of any UC plan(s) will be August 1.

What About Warrants?

If the state budget is not worked out by July 1, the state probably will issue warrants, or IOUs, to state employees similar to what was necessary during the Depression. UC hopes to avoid such a scheme, although it is not clear what actions UC would take if the budget is delayed beyond August.

15% Cuts for Central Administration

We've known about the desperate budget situation for some time now. To help the campus save money, a committee was appointed to address cutting costs from the central administrative budget. Central administrative is comprised of all of those units which report directly to the Chancellor — over 40 units in all. Under Senior Vice Chancellor Herbert Suelzle, the committee has asked each of those units to identify where 15% cuts can be made *permanently*. Managers from these units have been working since the beginning of the month trying to determine what programs or systems might be cut to achieve a budget reduction of this magnitude. The final draft of the central administra-

First Libby Gardner Awards to Two Dental Grads

Dental hygiene graduate Mari-Anne Low of Stockton and dental graduate William Vincent Hurias IV of Lodi are the recipients of the first Elizabeth Fuhriman Gardner Awards. The highest award given by the School of Dentistry to graduating students, it is in memory of the wife of UC President David Gardner who graduated from UCSF's dental hygiene program in 1958. She died in February 1991. President Gardner presented the awards at commencement last Saturday.

Low and Hurias received the award for their scholastic achievements, University service, leadership qualities and their concern for others. Low graduated from UC Davis with a BS in Biochemistry. She now is enrolled in UCSF's Master's Program in Oral Biology, and at the same time plans to enter a Bay Area practice. A graduate of Cal-Poly State in San Luis Obispo with a BS in Biological Sciences, Hurias plans to enter a private practice associateship in Lodi.

Three days before commencement at the School's Dean's Awards Dinner, Mark Crane of Scottsdale, AZ won the Francis A. Sooy Chancellor's Cup. Crane received his BS in Biology in 1985 from Northern Arizona University. He plans to do his residency in oral & maxillofacial surgery at UCSF.

Annual Awards Ceremony

Meanwhile, at the School's annual awards ceremony in late May, a total of 27 awards were presented to students in the dental hygiene class of '93 and the dental classes of '95, '94 and '93.

Professional development awards from the UCSF Dental Alumni Association went to Christian Olmstead, '93 dental hygiene; Janet Biscaha, '95 dental; Renay Ivens, '94 dental; and Michelle Henshaw, '93 dental.

Part of the ceremony also included staff recognition awards. Elizabeth Santos, an assistant in the B Clinic, for the eighth year in a row was honored for her support and enthusiasm, this year by the '93 dental hygiene class. The '95 and '94 dental classes recognized John Newman, lab assistant III, restorative dentistry, while the '93 dental class honored Rosa Kreitz, an assistant in the Dental Clinics.

Excellence in Teaching Awards were given to the following faculty: Judy Yamamoto, '93 dental hygiene; Charles McNeill, '95 dental; Dennis Davis, '94 dental; Donald Nakahata, '93 dental; Dorothy Perry, '92 dental hygiene; Renaldo Parisi, '92 dental; and Roger Peizner, the Riebe Award.

Distinction in Teaching Awards to Four; Craig Wins Service Award

The SF Academic Senate presented Distinction in Teaching Awards to Robert Baron, Joseph Guglielmo, Jr., Daniel Lowenstein, and Christine Miaskowski at its divisional meeting on June 2. Also at the meeting, John C. Craig became the first recipient of the Senate's University Service Award.

Established by the Academic Senate in 1951, the distinction awards are given annually to recognize excellence in teaching at our campus. Faculty are nominated by students and/or colleagues from the four professional schools and the Graduate Division. The University Service Award recognizes long-term dedication to the University and committee service.

Baron is an associate professor of clinical medicine and director of the Primary Care Residency and Continuing Medical Education programs; Guglielmo is professor, clinical pharmacy and assistant director, Inpatient Clinical Services in the Department of Pharmaceutical Services; Lowenstein is assistant professor, neurology; Miaskowski is associate professor, physiological nursing. Craig is associate dean, School of Pharmacy and professor, chemistry and pharmaceutical chemistry.

Distinction in Teaching honorable mentions went to Adele Clarke, social & behavioral sciences; Ronald H. Goldschmidt, family & community medicine; Jeffrey S. Klein, radiology; Philip E. LeBoit, pathology; Allan E. Siperstein, surgery; Marshall L. Stoller, urology; and Maurice S. Zwass, anesthesia.

Long Range Planners Face a Delicate Balancing Act

An advisory committee of UCSF employees wants campus planners to consider clustering new buildings at a few major sites rather than scattering more satellite facilities across the city.

Members of the University Advisory Group (UAG), a group of faculty, staff and students formed to provide campus participation in the Long Range Development Plan, cope every day with frustrations and inefficiencies that result from UCSF's far-flung operations. At a recent meeting, they pointed to problems ranging from transportation woes to a sense of psychological isolation felt by those working at remote sites.

But at a meeting of the Community Advisory Group (CAG), a separate committee of neighborhood, ethnic, and business leaders formed to provide external input for the LRDP, members urged planners to guard against creating more problems associated with major facilities such as the Parnassus campus. They cited parking, transportation, and displacement of businesses and residents.

The conflict illustrates just one of the delicate balancing acts planners face as they prepare a new long range plan to guide UCSF's growth over the next 15 years. The advisory groups are meeting throughout the process to help the University prepare a growth plan that serves both the campus and the community.

At the June meetings of the advisory groups, the members divided into small groups to

Campus Mourns Two Prominent Figures — Helen Nahm, William Tooley

Two prominent UCSF faculty died recently — Helen Nahm, one of the most influential nursing educators in our School of Nursing, not to mention in America in the 1950s, and famed neonatologist William H. Tooley.

Dean of the School of Nursing from 1958 to 1969, Nahm was responsible for introducing the School's Doctoral of Nursing Science (DNS) program, the first in the West and one of the few in the country at that time. Also during those 11 years, she introduced an innovative undergraduate program leading to a BS degree in Nursing, and an expanded clinical specialty program leading to a MS in Nursing.

During her tenure, the School increased in size from a student body of 250 to 450, with a corresponding faculty increase of more than 110 percent.

Nahm began her early nursing education in Missouri. At the same time she was pursuing a career, she attended graduate school at the University of Minnesota, where she received both her master's and PhD degrees.

Her top administrative positions were many, from dean of the School of Nursing at the University of Missouri, to dean at Hamline University in Minnesota and at Duke University. She made her impact on national nursing just before coming to California by serving in numerous director positions with the National League for Nursing in New York. While there, she pioneered efforts toward accrediting nursing programs, the basic principle and practices of which still are utilized. Her distin-

(continued on page 2)

Rita Jue is the "Ideal Pharmacist"

School of Pharmacy graduate Rita A. Jue of Ventura won the top honor of the School — the prestigious Bowl of Hygeia award — during commencement last Saturday afternoon. Runners-up for the honor, which names the "ideal pharmacist," were Daniel B. Quan of Long Beach, Shalini Shah Lynch of Orangevale, Gerdelie M. Wolfert of Daly City and Romy L. Wong of Castro Valley.

Jue is described by students and teachers alike as a "behind-the-scenes leader," one who never praises or promotes herself, but is always there to organize and help out when needed. Secretary of her third-year class at UCSF and a member of Rho Chi, the national pharmacy honor society, she went to UCLA for two years, leaving in 1990 to enroll at UCSF. She plans to do her first-year clinical pharmacy residency at Duke.

Also announced at graduation were the names of three outstanding students who had achieved the highest grade point averages. In order, they are: Alaina M. Poon of San Bruno, Melinda G. Stafford of Carlsbad and Margaret E. Tonda of Walnut Creek.

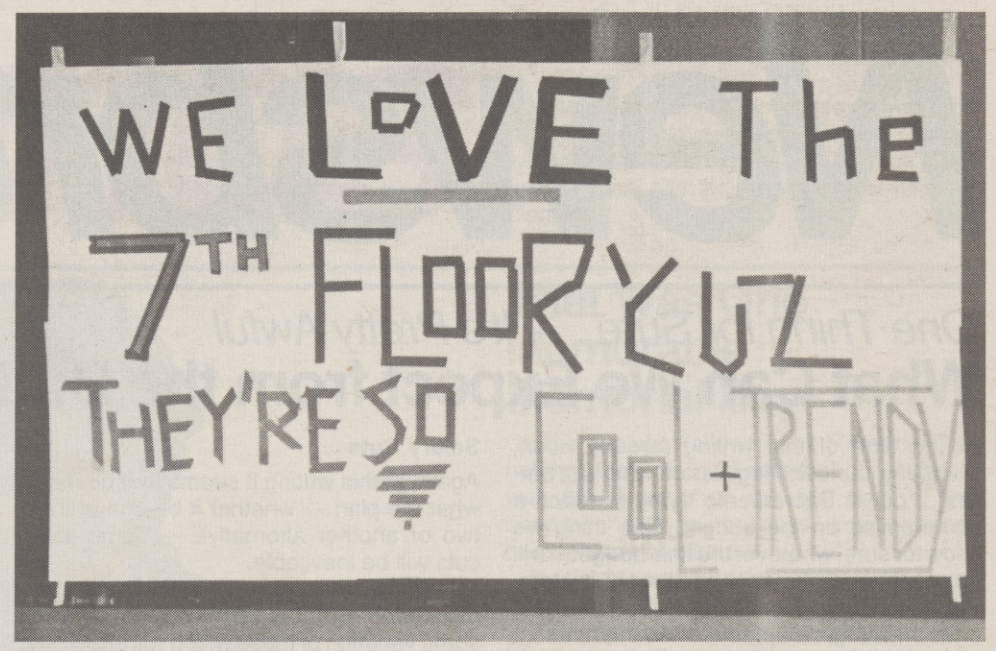
In all, 107 students received their PharmDs during commencement. The School did not have a separate awards ceremony this year.

Gazette

Appointments

Steve Neuberger: Appointed director, community relations, in the Division of Public Affairs. He works with neighborhood groups and leaders to provide feedback to UCSF officials regarding community issues and the campus' Long Range Development Plan (LRDP). He helps assess how campus decisions may affect the community and identifies ways in which UCSF can add to the quality of life in the city. Neuberger is former chief lobbyist for Mayor Art Agnos and onetime political director for the largest public employee union in San Francisco, United Public Employees Local 790.

Roger P. Simon: Appointed chief of staff at SFGH for two years, a post that is usually held for only one year. He serves as liaison between the medical staff and hospital administration, relaying the concerns of each group to the other. His is a key function in light of the pending affiliation agreement between the campus and the City & County of San Francisco. He works principally with the School of Medicine's associate dean at SFGH, Elliot Rapaport, and Richard Cordova, the hospital's executive administrator. Simon continues to serve as professor and chief of neurology, SFGH.



Love You, Mean It!

Andrew Murray's Biochem lab on the 7th floor of Medical Sciences has a clear view of the Biochem lab on the 9th floor of HSW. Murray's folks have been taking advantage of this by conveying subtle messages on their windows to their pals in HSW. The latest was: "We hate the 9th floor and everything it stands for!" The despised 9th floor turned the other cheek with the above poster.

In Memoriam

Fred Ping: Head caterer for the Mount Zion Food Service since 1985, he came to the department as a food service worker in 1983. As head caterer he was responsible for all catered functions at the hospital, many times working them single-handedly. He also catered and tended bar at the hospital's monthly medical staff dinners. Working with department heads, administrators and anyone who needed a hospital event catered made Ping one of the best-known faces around Mount Zion. In 1988, he was nominated for Mount Zion's Rose Award (a special honor recognizing outstanding service). He was 41. Memorial donations may be sent to Jing Ping, 4140 Fulton St., SF, CA 94121.

Joseph Brady: An administrative assistant in the outpatient section of Mount Zion's physical therapy division since 1990, he started as a clerk/typist in 1987. His responsibilities included scheduling appointments for physical, occupational and speech therapy patients, billing, processing insurance forms, and maintaining all office systems. He also volunteered for the organization Living Sober. Brady was 30. Donations may be made to the SF AIDS Foundation, 25 Van Ness Ave., SF, CA, 94102.

Atwater & Moore Win Teaching Awards

Susan K. Atwater (left) and Joanne Moore have been chosen by the Department of Laboratory Medicine residents to receive their annual teaching recognition awards. Atwater is assistant professor and Joanne Moore is senior clinical laboratory technology specialist at SFGH.

Nahm/Tooley *(from page 1)*

guished and hallmark achievements while at the NLN during its formative years were recognized in 1967 when she received the organization's Mary Adelaide Nutting Award.

Nahm believed that there is an explicit difference between medicine and nursing. To put her philosophy into practice, she created the School's first Social & Behavioral Sciences Department. This was the first basic science department within any school of nursing, and today still serves as a prototype.

Throughout her career, Nahm influenced nursing through her work on a variety of commissions, committees and task forces. Of special note was her ability to mastermind a cooperative nursing education program where she convinced 11 schools of nursing to work together to improve graduate student education in California and Nevada.

While Nahm was awarded many honorary degrees from a variety of universities, one honor of which she was most proud was the School of Nursing's annual Helen Nahm Lecture which began on campus in 1981.

Nahm died in Missouri, the state in which she was born, at the age of 90.

William H. Tooley

Tooley, an internationally renowned pediatrician and neonatologist, died at the age of 66 after a long illness.

A gifted researcher, Tooley's professional career was devoted to the study of cardiovascular and pulmonary functions of the fetus and newborn infant. His investigations, which he reported in more than 100 articles, led to a better understanding of lung development, control of breathing, respiratory distress of the newborn and circulatory adjustments at birth. His pioneering application of these studies to clinical care of newborns helped lead to the founding of current neonatal intensive care.

The UCSF Intensive Care Nursery, which Tooley established in 1964 and which the UC Regents named in his honor in 1991, was one of the first such facilities in the world. Tooley and head nurse Teresa Mannix Poirier collaborated to involve neonatal nurses in the complex techniques of caring for sick infants and set policies of practice that have become the standard of care throughout the world.

Tooley was an eloquent and beloved teacher who trained dozens of research fellows in newborn medicine and childhood lung diseases, many of whom are leading academicians in medical schools around the globe. A distinguished lecturer in several countries and a member of more than a dozen scientific societies, he had several honors to his name, including the Mead Johnson Award of the American Academy of Pediatrics for Research and the Virginia Apgar Award for Distinguished Contributions in Neonatology. He also was a Markle Scholar in Academic Medicine.

A native of Berkeley, Tooley attended Carroll College in Montana through the V-12 program of the US Navy and received his MD from UCSF in 1949. He served as a senior medical officer for the US Navy's Antisubmarine Forces, Pacific Fleet, 1951-54 and was a member of the Navy Reserves for many years. He was a member of the UCSF faculty in the Department of Pediatrics and Cardiovascular Research Institute for 30 years. He retired in 1991.

A memorial service will be held on Tuesday, July 14, 3 p.m. in Toland Hall. The family suggests contributions to the Tooley Memorial Fund, payable to the UCSF Foundation, Division of Neonatology, Box 0734.

Discount Tickets Extended to July 10

See Nureyev Baton a Thousand

Discount tickets for UCSF staff and faculty who would like to see Rudolph Nureyev conducting the UCSF Orchestra on Saturday, July 17, now will be available through Friday, July 10. Tickets at $25 each, which is 50% off the regular price, are available at the Millberry Central Desk. Tickets at $15 each for students also are available. After that date, tickets at $25, $35 and $50 general, plus $175 for gala post-concert dinner and performance, will be available from Theater on the Square Box Office, 433-9500, or BASS at 510-762-BASS.

Nureyev, known around the world as a ballet legend, is making his West Coast conducting debut with the UCSF Orchestra at the Masonic Auditorium, 1111 California Street. Proceeds from the concert will benefit research in the UCSF Department of Urology and the UCSF Orchestra.

One might wonder if Nureyev's ballet talents will translate into polished conducting abilities. Perhaps these notices following his US conducting debut with the American Ballet Theater in New York earlier this month will help:

"He performed wonders." Clive Barnes of the *New York Post.*

"Now 54, the century's most celebrated male dancer has got a leg up on a new career as a conductor . . . Nureyev demonstrated that he has all the right moves." Time magazine.

"Nureyev proved himself an expert with the baton . . . one of the finest readings of the Prokofiev score this critic has heard." The *Daily News.*

Nureyev's program on July 17 will include Beethoven's Symphony No. 3 in E flat major ("Eroica"), and selections from Prokofiev's "Romeo and Juliet."

For further information call UCSF Arts & Performances at 476-2542.

AIDS Health Project Events — June 28 Carnival, July 18 Health Fair

The UCSF AIDS Health Project is gearing up for two busy and exciting events. For the first time ever, there is going to be a Freedom Day Carnival following this year's Gay & Lesbian Freedom Day Parade on Sunday, June 28, from 4 p.m. to midnight. The block-long Carnival will benefit the AIDS Health Project and two other AIDS organizations — the AIDS Emergency Fund and the Stop AIDS Project. It will be held on Townsend Street between 2nd and 3rd in front of the dance club Pleasuredome, which is sponsoring the event.

There will be carnival rides, street entertainers, great food, as well as games of skill run by other AIDS, lesbian/gay and community organizations. That night there also will be a dance party — "The Big Top" — inside Pleasuredome, which also will benefit the three projects.

Volunteers are needed for the events. Please call Bill Camilo at 626-4258.

First South of Market Health Fair

The AIDS Health Project then will join forces with the South of Market Health Center to sponsor the first South of Market Health Fair on Saturday, July 18, from 10 a.m. to 4 p.m. at 551 Minna Street. Besides free blood testing for HIV, people will be able to have their blood pressure and cholesterol levels checked. Under the theme, "Togetherness is a Part of Healing," there will be a variety of health professionals at the fair offering TB tests, health and dental education information, and safe sex kits and bleach.

Participants will be treated to live music by "The Zone" while they sample a variety of ethnic foods. Face painting also will be available.

For further information on both events, call the AIDS Health Project at 476-6430.

Chilly Academic Climate?

Are female students called upon less frequently than male students? Are women faculty members taken less seriously than their male counterparts? Are women staff expected to perform the more menial tasks regardless of their classifications?

If you are a woman on campus and feel that you have been treated differently, however subtly, because of your gender, let the Women's Resource Center (WRC) know. Members of the WRC are compiling these types of vignettes to help design educational materials about sexism. Please send your anonymous vignette(s), including department or school in which it occurred (will remain confidential), to the Women's Resource Center, Box 0909. For further information call 476-5836.

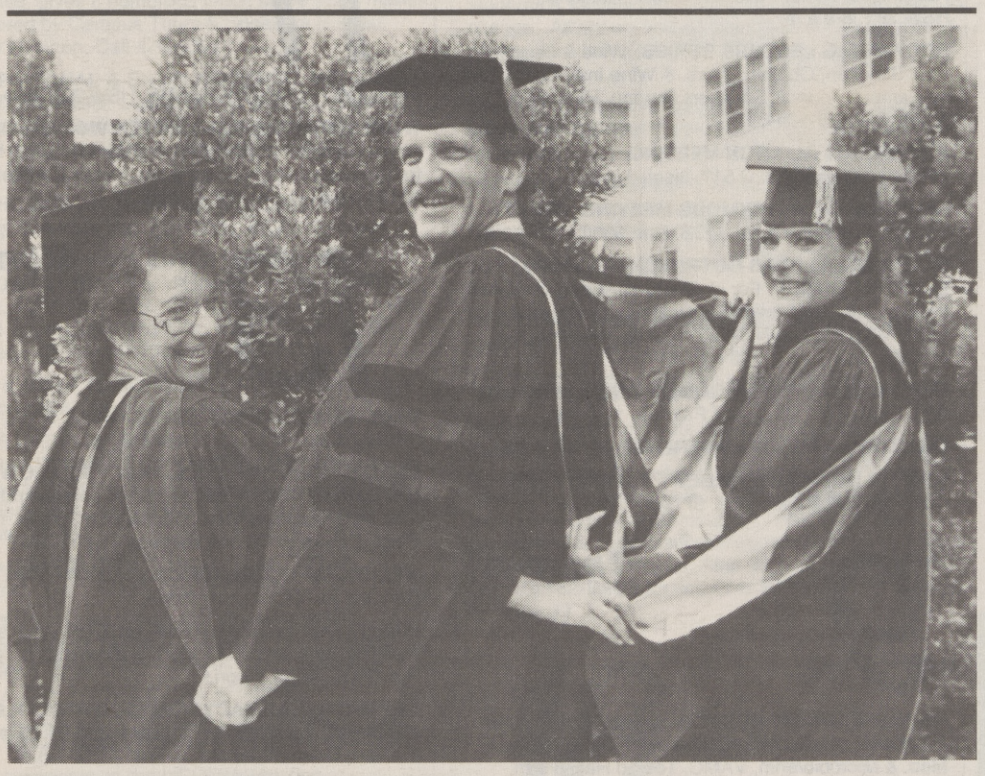
Unrelated to the above request, *Newsbreak* plans to cover harassment and sexual discrimination in the next issue, which comes out July 25. You will find out, among other things, the approaches the campus is using to help counter this climate.

Another Boost for Student Loans

Continuing their long tradition of support for UCSF students, the UCSF Faculty Wives and Associates raised another $23,500 for the student financial aid program. The gift was announced at the group's annual spring meeting in May.

The Faculty Wives and Associates established a student loan fund in 1970 with an initial contribution of $1,500. Now worth more than $275,000, this fund is a continuing source of loans for UCSF students. Nancy Kull, director of financial aid, explains that as borrowers graduate and begin repayment, the funds are "recycled" to the students.

The group has earmarked $1,000 of the 1992 gift as a scholarship in memory of Ann (Mrs. John) Alden, one of the group's very active members.



Grads 'N the Hoods

The Graduate Division Alumni Association this year honored graduates (left to right) Lora Lempert, Mark Shattuck and Diana Darnell with PhD hoods for their leadership roles in the Graduate Students' Association. Lempert, with a PhD in Sociology, served as vice president, basic & social sciences; Shattuck, with a PhD in Bioengineering, served as president, external affairs; and Darnell, with a PhD in Anatomy, who also was a UC Student Regent, served as president, internal affairs.

Teresa McGuinness gives a congratulatory pat to Larry Tecott after the ceremonies.

Psychiatry Honors Nine at Commencement

Six psychiatry graduates and three faculty members were honored during the department's commencement exercises on June 5. Awards to residents included: Teresa L. McGuinness, the Edwin F. Alston Award; Karen J. Wahmanholm, the Henry F. Albronda Award; Elizabeth A. Zirker, the Alexander Simon Award; Laurence H. Tecott, the Creative Psychiatric Resident Award; and John G. Devine, the National Psychiatric Endowment Award. The Robert E. Harris Award for Clinical Psychology went to fellow Kathleen K. Schutte.

Robert I. Mahon, chief of psychiatry, won the Interdisciplinary Achievement Award, while Elaine Lonergan, associate clinical professor, and James W. Dimon, assistant clinical professor, both received Residents' Association Awards for Teaching.

Mount Zion Community Meeting on Proposed Construction July 15

The second in a series of community meetings for the Mount Zion neighborhood regarding proposed construction at the Mount Zion site will be held on Wednesday, July 15, beginning at 7 p.m. in Herbst Hall, 1600 Divisadero.

According to Joe Martin, dean of the School of Medicine, it is critical for the campus to modify the original construction plans if we are to successfully create a new National Cancer Institute (NCI) designated Comprehensive Cancer Center. At the time, there are two such centers in Southern California, but none for Northern California's 12 million people.

NCI-designated Comprehensive Cancer Centers engage in a broad spectrum of research including basic science, clinical investigation, and cancer prevention and control with heavy emphasis on the ability to transfer those research findings into the latest treatments for cancer patients.

At the first meeting on June 15, UCSF/Mount Zion officials outlined the proposed changes that require supplementing the original Environmental Impact Report (EIR). The July 15 meeting is another step in the "Subsequent" EIR review process aimed at getting public comments and keeping the community informed.

NCI has approved a three-year planning grant for UCSF to begin developing the Center. (See adjacent article).

The main proposed changes include converting the Pavilion building, located at 2356 Sutter Street, into an interim Cancer Center while the new facility is being built. Martin says that locating outpatient team members at one site will help facilitate collaboration from the beginning. (The original 1990 plan called for the Pavilion to be demolished to make way for two new buildings — a research center and an outpatient clinics/medical offices structure with underground parking.)

Since the new proposed plan calls to currently retain the Pavilion, UCSF proposes that the new research building be built on land adjacent to the Pavilion and that other land be sought for needed medical office space for those practitioners displaced by the research building construction. In addition, it has been found that below ground parking will be an inefficient use of space and very costly. Therefore, it now is proposed that land should be found to construct above ground parking.

The Subsequent EIR will address the impact of the proposed changes on related city plans and policies, land acquisition and displacement of existing uses, parking, hazards and any other significant matters which might be identified.

For more information call UCSF Community Relations at 476-3206.

We're Appealing

Lawyers for UCSF have asked the California Supreme Court to reverse a recent court order which requires the campus to recirculate the latest Environmental Impact Report (EIR), which details plans for our Laurel Heights site. The lawyers argue that the order was not based on any clear legal standard.

The Supreme Court is being asked to review a May 12 ruling by the First District Court of Appeals in San Francisco. In that decision, two members of the three-justice Court of Appeals upheld a challenge to the EIR filed by the Laurel Heights Improvement Association, which has been opposing UCSF's plan for nearly six years. The Court of Appeals ruling concerned only the narrow procedural question of whether the Final EIR was required to be recirculated for additional public comment, not the content of the EIR.

NCI Gives Green Light to UCSF

The National Cancer Institute has approved and funded a grant enabling UCSF to proceed with plans to create an NCI-designated Comprehensive Cancer Center. The NCI has approved a three-year, $525,000 grant giving the campus the green light to plan the center, with the main component to be located at Mount Zion.

If everything goes as scheduled, UCSF officials hope to receive NCI's formal "Clinical" Cancer Center status by 1996 and "Comprehensive" status by 1997.

An important goal of the Center, according to Joe Martin, dean of the School of Medicine, is to build bridges among the three major areas: basic science research, clinical care and epidemiology, and prevention and control. "The idea is to create an atmosphere of interaction which ensures that new advances in prevention, diagnosis and treatment which will get to the patient in the fastest time possible," he says.

The Center will merge cancer-related activities at all UCSF sites within the Schools of Medicine, Dentistry, Nursing and Pharmacy, and the Graduate Division, as well as at all four affiliated hospitals — Moffitt/Long, Mount Zion, SFGH and the VAMC — as well as the UCSF Medical Education Program in Fresno.

Today/Tomorrow

27 Saturday

WOMEN'S RESOURCE CENTER WORKSHOP: *Quilting: A Woman's Art.* Susan Hackett, quilting teacher, will help you create wall-hangings & small quilts. $20-30. N 417. 10 a.m.-4 p.m. Call 476-5222.*

28 Sunday

BAY AREA AFFILIATE, RETINITIS PIGMENTOSA FOUNDATION LECTURE: *Update on Retinitis Pigmentosa.* Michael F. Marmor, Oph., Stanford. HSW 301. 1 p.m. Call 476-8384.

AIDS HEALTH PROJECT CARNIVAL & HEALTH FAIR

UCSF AIDS Health Project co-sponsors the following events. Call 476-6430. (See story on page 3.)

- Sun., June 28: *Freedom Day Carnival.* A block-long carnival featuring rides, entertainers, food & games, benefits the AIDS Health Project & two other organizations. Townsend St. between 2nd & 3rd Sts. 4 p.m.-midnight.*
- Sat., July 18: *South of Market Health Fair.* Free tests for HIV, plus blood pressure, TB & cholesterol. Health & dental information, safe sex kits & bleach available. South of Market Clinic, 551 Minna. 10 a.m.-4 p.m.*

CRI HEMATOLOGY/ONCOLOGY JOURNAL CLUB. M 1296. 8 a.m.

MOUNT ZION MEDICINE GRAND ROUNDS. Herbst Hall, MZ. 8:30-9:30 a.m.

COLE HALL CINEMA: *American Tale: Fievel Goes West.* Children under 14 $2; UCSF students & MU members $2.50; students & seniors $3; general $3.50. Movies subject to change. All shows free for grandparents accompanied by grandchildren. Cole Hall. 10:30 a.m., 6 & 8 p.m. Call 476-2542.*

SFGH PROGRAM IN CELLULAR & MOLECULAR MEDICINE SEMINAR. Rm. 3208, Bldg. 30, SFGH. Noon.

INSTITUTE OF HEALING ARTS & SCIENCES LECTURE: *Psycho-Spiritual Medicine: A Bridge Between Physicians & Healers.* Antonio Costa e Silva, SHIDA Fndt. N 721. Noon. Call 584-4416.*

OVEREATERS ANONYMOUS MEETING. Rm. 300C, MCB. 12:05 p.m.*

ALCOHOLICS ANONYMOUS MEETING: Closed meeting: alcoholics only. C 417. 12:10-1 p.m.*

THE NEXT DEADLINE

Tues., July 14, is the deadline for items to be listed in the next calendar, which covers **July 25-Aug. 21, 1992 (four weeks).** They must be received in our office in writing by 11 a.m. on that Tuesday. Mail your copy to Michele Firpo at Box 0462, call 476-1541, send a fax to 665-8668 or bring it to S 20.

Colleen Johnson Is Health Net Lecturer

Colleen Johnson, professor in residence, medical anthropology, is the UCSF winner of the UC/Health Net Distinguished Wellness Lecture Award for 1992. She was selected as one of six faculty recipients — one from each UC health science campus.

The lectureship includes two presentations, one at UCSF in early October (details to be announced) and another at a policymaker's forum in November. Johnson's working title is "Medical and Service Issues in Sustaining Community Living of the Very Old."

The award carries a $2,500 cash prize, plus $1,000 for research assistance. The papers of the six lecturers will be compiled into a "Wellness Notebook" to be distributed to health policy leaders.

Name This Page and Be All the Rage!

You may have noticed that this section of the paper has a new name. It used to be called *Benefits/Personnel*. But, over the last several issues this page has held much more general campus news. We decided that while continuing to run benefit/personnel stories, we won't do so exclusively, but instead will broaden this page's scope.

The question remains, "What shall we call this page?"

We decided to give our readers a shot at the task. What will you win? Well, in the spirit of promoting a good thing, we are offering any item that is available in "Bear Hugs," the new EMPACT! employee recognition program. The program offers gift certificates ranging from $2.50 to $30 from campus outlets as well as restaurants, wine and gift shops, clothing stores, and bakeries in nearby shopping districts.

Send your page-renaming ideas, along with your name, department, and campus extension to: *Newsbreak*, Box 0462, by Wednesday, July 15.

(Maybe you like the name Page 6. *Let us know.)*

Police Lost & Found Auction July 10

The UCSF Police will hold a Lost & Found Auction, complete with celebrity auctioneers, on Friday, July 10, from 11 a.m. to 1 p.m. in Saunders Court.

Some of the items to be auctioned include:

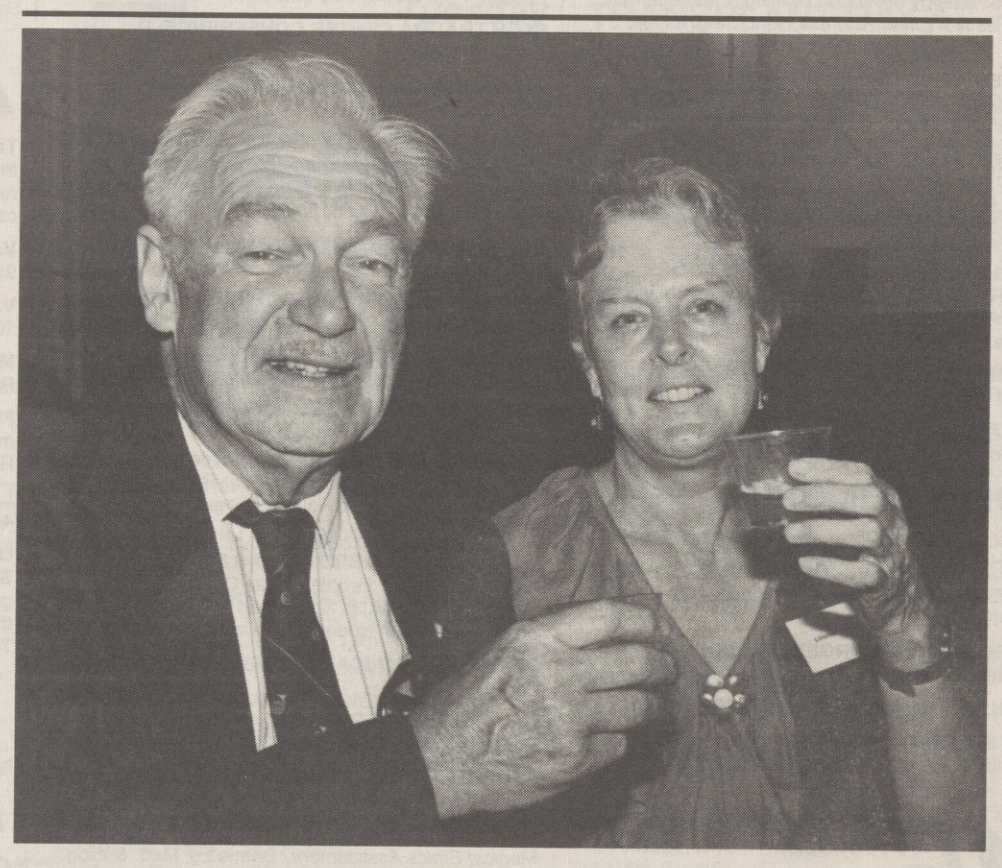
- Calculators
- Watches
- Bicycles
- Jewelry
- Umbrellas
- Briefcases
- Car stereos
- Books
- A wheelchair
- Many knick-knacks and odds & ends

Prospective buyers can preview items between 9:30 and 10:30 a.m. If you see something you think belongs to you, and you can prove it, you can claim ownership — but only during the one-hour preview period.

The terms of purchase are "cash only" and "all sales final." If you have questions, call the Police Department at 476-1414.

Personal Disaster Plan Cards

You recently should have received in the campus mail a green card headed "UCSF Disaster Plan." This index-size card contains a summary of the information you need to prepare for emergency and to assist you at the time of a disaster. If you did not get a card or have questions, contact Sergeant John Fox at 476-9240.



8,000 Years of Service!

In the largest celebration of its kind ever on this campus, staff employees who had either retired or had reached their 25th year of service in 1991 were honored on June 15. A total of 365 employees were recognized, including 318 retirees, many of whom last year had taken advantage of the Plus 5 program. With a mere 8,000 years of service among them, the group included Louisa Gagwin, a research data collector in neurosurgery. At UCSF since 1966, she first worked for Salvatore Lucia, part of UCSF's vivid history, whose motto was, "Wine is food and medicine." Louisa (above) with friend Al Cox offer an appropriate toast.

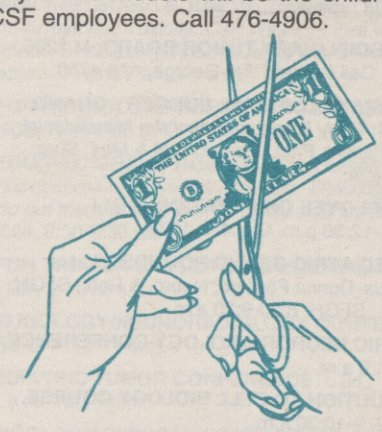
Fun Zone

"Fog Fun" Every Wednesday in July

While most of the world is sweating it out in the July heat, the UCSF crowd not only can look forward to cool fog, but also to "Fog Fun." This is the concert series sponsored by Arts & Performances every Wednesday in July at noon at the Plaza Grill. This year's line-up features mostly jazz with a little bit of country, Broadway, blues and reggae. (Full schedule on page 4 of the *Today & Tomorrow* calendar.)

Also on the summer schedule:

- **Discounts at amusement parks.** If your summer agenda includes a trip to Great America, Marine World Africa USA, Disneyland or a few trips to the movies, stop by the MU Central Desk and pick up discount tickets, sponsored by EMPACT! Call 476-2675 for ticket outlets at satellite locations.
- **Terrific camp for teens.** Give your teen the experience of a lifetime. The Teen Adventure Camp offers an 11-day wilderness adventure in the High Sierra — backpacking, rockclimbing, whitewater rafting, outdoor living. Trip dates, Aug. 3-14. Call 476-0417.
- **Kayaking/Boardsailing Courses.** Sponsored by Outdoors Unlimited during July and August. Call 476-2078 for agenda.
- **Save Monday, August 31!** This is the date of the Hospitals Auxiliary luncheon and children's fashion show at the Ritz-Carlton. Many of the models will be the children of UCSF employees. Call 476-4906.



- **Last chance for HalfPrice Europe.** If you're planning a European excursion between now and next June (1993), be sure to check out the "HalfPrice Europe 92/93" discount books offered by the Hospitals Auxiliary. The $30 book offers discounts of up to 50% at many fine European hotels, retaurants and tours. A review copy is available in the Beartique gift shop. To purchase, call 476-4906.

Library Must Cancel 700 Journals

In order to conform to a reduced budget, the Library must cancel its subscriptions to some 700 print journals. This cost-savings measure will allow the Library to purchase over the next coming year new material most important to the daily work of campus scientists, clinicians and students. The Library is asking for advice from faculty, staff and students regarding this matter. A list of potential cancellations is available in the Library and posted on the MELVYL System opening screens. If there are journals which you consider an essential part of your work, call Glennda Vandegrift at 476-8415 or e-mail comments to gv1636@ucsf.cca and the journal will be reconsidered.

Budget *(from page 1)*

tive budgets will include input by the schools and Medical Center representatives.

If you've ever prepared a budget, you know that it is no easy task. Preparing a budget for UCSF, let alone the entire UC system, is needless to say cumbersome and complicated. On our campus alone, one has to consider how different the campus activities are from the hospitals' activities, and how different those needs are from the schools'. UC administrators promise that they will come up with as equitable a program as possible.

Stay With Us

Stay with *Newsbreak*. We will keep you informed the best that we can. Be sure to also check other campus news outlets, including 502-NEWS, the e-mail system and mailings.

Long Range Planning Groups *(from page 1)*

begin weighing the advantages and the problems posed by UCSF development. Each group focused on one area of concern.

Economy and Jobs

Both groups emphasized the importance of providing job opportunities to a cross section of the community where new facilities are located. CAG members argued that UCSF must step down from the "elevated position" it now commands by committing itself to hiring neighborhood residents and developing other kinds of direct involvement in the community.

Members of the community group also urged the campus to keep all new facilities in the city. The campus group discussed the need for additional staff training opportunities.

Land Use

The small groups discussing this issue split over the advantages of clustering facilities vs. problems created by major campus sites such as Parnassus. CAG members acknowledged, however, that outlying sites face problems such as poor transportation and a sense of "isolation."

The community group also resolved that "the University must be specific about the intended uses of any new facility" — a reference to the continuing dispute over plans for Laurel Heights. (See article on page 3 for the latest on that.)

Services and Amenities

Both groups listed affordable housing, child care and fitness centers among the services UCSF should try to include as part of future development. UAG members also discussed the importance of safe and pleasant work environments, and the community group cited the advantages of having a UCSF police department close by.

The community group suggested that operating neighborhood health clinics at its facilities would "enhance UCSF's image."

Environmental Health, Safety

Some of UCSF's most vociferous critics dominated the discussion in the community group. Their bottom line, especially in terms of environmental health and safety, as stated by one of the participants was, "You scare us."

The UAG also discussed the lessons of Laurel Heights, concluding that UCSF must avoid problems of the past by educating the community about research and clinical activities. "Be forthright," they advised. The campus group also discussed the logistical problems scattered site development poses for environmental safety monitoring.

Transportation and Parking

Both groups noted the need for parking facilities at any new sites, but they also called the need for public transit "critical" and proposed a partnership between UCSF and the city in providing a mass transit line.

Community Health

Both groups were in favor of continuing UCSF health education programs in public schools and establishing more community health clinics in the city's neighborhoods. CAG members again cited the "mystique about the facility on the hill" as an impediment to UCSF's growth and acceptance.

Look to future issues of *Newsbreak* as more meetings are held.

About Jordan's Letter

During the second week of June, you may have read in the *SF Chronicle* or *Examiner* news stories about a letter Mayor Frank Jordan sent to UCSF regarding our expansion needs. The letter outlined his interest in providing the campus with critically needed space inside the city.

The letter included several proposals, from an expansion of Mission Center to occupying space at Mission Bay and Hunters Point. The Mayor also said he would lobby aggressively in favor of UCSF's proposal to acquire Letterman Army Institute of Research, a facility adjacent to Letterman Army Medical Center, which is scheduled to close down in 1994 as part of the Army's plan to leave the Presidio. UCSF is considering submitting a letter of intent to lease Letterman and has until July 15 to do so. More news to follow in *Newsbreak*.

Medsounds Continued

July 9 is UCSF Transplant Day at Candlestick

The UCSF Kidney Transplant team performed its 4,000th transplant on June 18. To celebrate this milestone, UCSF and the San Francisco Giants have planned a "UCSF Transplant Day" at Candlestick Park on Thursday, July 9.

The idea is to get together a huge group of former patients, donors, families, referring physicians and UCSF staff members to attend the game and celebrate together. The Giants play the Montreal Expos that day.

According to Kent Graham of the Transplant Service, the Giants have pledged a block of discount tickets and several corporate sponsors have offered to help pay the way. The hope is that the 4,000th recipient will be able to attend as the guest of honor.

As a kickoff to the celebration, Giants relief pitcher Jeff Brantley recently paid a visit to young transplant patients at UCSF. The theme for the day, says Graham, was "Saves Games, Saves Lives" — referring to Brantley and UCSF, respectively. (Brantley is known as the Giants leader in "saves," i.e., saving the game with his pitches.)

For further information on "UCSF Transplant Day," call 476-1551.

Gospel Group Wins Academy Award

You may remember a recent article in *Medsounds* on Andre Williams, a member of the Nutrition & Dietetics staff. He belongs to an up-and-coming gospel group, the Bay View Opera House Community Choir. The article made mention of the fact that Andre's group was up for nomination for a Gospel Academy Award. The happy ending is, they won! The Gospel Academy Awards ceremony is held each year in Oakland.

UCSF in Top 10 — Third Year in a Row

For the third year in a row, the Medical Center at UCSF has been named one of the country's 10 best hospitals in a survey of leading physicians.

Results of the third annual survey, conducted by *US News & World Report*, appeared in the June 15 issue of the magazine.

US News, in conjunction with the National Opinion Research Center, asked 1,600 of the country's leading doctors to name the top medical centers in 16 specialties. The 10 hospitals included in the "best of the best" list appeared on three or more of the lists of top centers in the various specialties.

The respondents cited UCSF as one of the best in AIDS, endocrinology and neurology. SFGH was cited as the best in AIDS care by 61% of the respondents, far more than any other institution in the country.

Safety Fair Winners

The organizers of the recent Safety Fair in the Moffitt Cafeteria have a pack of winners to announce. The raffle prize winners include:

- Consuelo Linares, ACC Administration (earthquake kit)
- Edward Bautista, Nutrition & Dietetics (fire extinguisher)
- Ruby Siero, ACC Peds II (fire extinguisher)
- Tanis Buller, OR (smoke alarm)
- Joyce Lehman, Hematology (personal protection package)
- Mike Malhmeister, Respiratory Care (tear gas class)
- G. Gutman, LPPI (infection control kit)

Winners of the "Wheel of Protection" game included Transport's Krissie Louie, Radiobiology's Maricel Valcarcel, ECHO's Sam Garaci, ECHO's Elizabeth Ozawa and OB/Gyn's Eileen Hunt. Each won a Safeway gift certificate.

The organizers say they'll be back next year with the third annual fair. They're already thinking up all kinds of new and better-than-ever safety games for the 1993 fair.

Big Check from Johnson & Johnson

Representatives from Johnson & Johnson Hospital Services Division visited Bill Kerr, Helen Ripple and Auxiliary president Ilse Steinbach recently and brought along a check for more than $8,000. The money, a rebate from J&J goods purchased by UCSF, is designated to the Auxiliary to use for patient amenities.

FIP Recommendations Coming In

All through the spring and early summer, numerous FIP task forces and clinical initiative groups have been meeting to come up with ways to save money and/or improve efficiency in areas all around the Medical Center.

According to Ruth Brentari, the FIP communications coordinator, the recommendations and reports from these groups are due the last week of June.

As the recommendations are approved for implementation, the plans will be reported here as well as at staff meeetings and department newsletters. Stay tuned.

Hidden, But Not Forgotten

There are two members of the Utilization Review staff, Carol Brito and Gaby Cordova, who are not exactly the most visible employees in the world.

We're not saying that what they do is unimportant — their diligent work on MediCal accounts is crucial.

It's just that the two are tucked away in a back room of an already somewhat isolated unit, neither to see nor be seen by the outside hospital world.

And not that they complained, either. The other people in their department started thinking that Carol and Gaby are just the kind of people who *deserve* to be more visible.

Thus, they organized "National Honoring Carol and Gaby Day." They surprised them with gifts and lunch; they hung signs and wore buttons; and invited all the neighboring units to stop by.

If you missed it, better mark your calendar for next year — June 8.

Utilization Review's hidden twosome: Gaby Cordova (left) and Carol Brito.

Tim Mahaney's Poster is a Big Hit

Perhaps you remember from a previous *Medsounds* that Tim Mahaney of Design & Construction won Infection Control's "Person of the Year" award. He got the award for setting up guidelines to control dust during construction projects. Since the implementation of these guidelines, cases of aspergillus (which is carried by dust) have plummeted in the Medical Center.

At the recent National Infection Control Meeting in San Francisco, Tim, along with infection control nurses Marilyn Jordan and Shirley Young, presented a poster on the guidelines. People were so interested in the concept, a great line formed in front of their table to view the poster, which is cleverly done up in blueprint fashion.

"Judging from people's interest, I'd say our guidelines may end up having a national impact," says Marilyn. The aspergillus cases in the Medical Center went from 22 cases in 1990 down to 6 in 1991.

Another popular poster at the convention was one presented by Respiratory Care's Jim Fink and Mike Mahlmeister. Their presentation demonstrated cost-saving and efficiency enhancing measures for critical care units.

Random Shots

Debbie Caulfield

Position: Office staff, Ob/gyn Faculty Practice

Also: Writes the profiles and breezy gossip column for *ACCess*, the ACC newsletter.

How she got this job: "I told the editors the newsletter desperately needed livening up."

How she finds her subjects: She goes after the quiet, unsuspecting types.

How she gets so much information about them: She doesn't interview the subjects of her columns. She interviews their friends.

Her inspiration: "I love Hollywood." She reads all the gossips, not excluding Herb Caen.

Another of her loves: Frank Sinatra. She took her whole family to see him when he came to the Circle Star Theatre.

About her family: From a big, old-time San Francisco Italian family. "I took some of my friends with me to my family's for dinner one night. They related it to a Fellini movie!"

About herself: "I have my outrageous side. I'm not your conservative type who wears blue suits to work. Or anywhere else."

About working at UCSF: "I wish people would loosen up. I'm not talking about my particular department, I mean overall. I know a lot of people are doing serious work, but that doesn't mean we have to take ourselves so seriously."

What people don't know about her: "Well, I definitely have my own serious side. I'm a single mom, I have a 12-year-old son, I go to college. My son and I spend time discussing issues we find important. But we always make time for fun. Life's too short, and enjoying yourself is way up there on my list."

Heart Transplant Program Certified for Medicare Reimbursement

UCSF's heart transplant program recently was certified to receive Medicare reimbursement. Qualifying for certification requires a lengthy review process that examines expertise of medical teams, quality of patient care, survival rates and other factors. "The certification has further significance," says Planning & Marketing's Reece Fawley, "since most HMOs use the Medicare certification as their own standard for contracts."

UCSF's three-year-old heart transplant program reports survival rates of 87% after two years, as compared to the national average of 75%. Fraser Keith and Teresa DeMarco are program director and medical director, respectively, of the heart transplant program.

Other UCSF transplant programs certified for Medicare include the kidney and adult liver programs.

Their Class Project Will Hang in Our Halls

This is Arva Robinson's seventh-grade class from Martin Luther King, Jr. Middle School, pictured with Rosanna Knapp (top left) and Debbie Trevithick (top center), both of the Pediatric Clinical Research Center (PCRC) staff. The class made this quilt themselves and presented it to UCSF in the name of children with AIDS. This is UCSF's second quilt dedicated to young patients with AIDS. The first was handmade by third-graders from Alamo School in San Francisco. Both quilts will hang in the vicinity of the PCRC. The PCRC is part of a network called the Northern California AIDS Clinical Treatment Centers, which provide treatment protocols for persons — in this case children — with AIDS.

New Liver Transplant Surgeon Brings Living-Donor Program to UCSF

When Jean C. Emond arrives July 1 to join the UCSF Liver Transplant Service, a new living-donor liver transplant program will begin at UCSF.

Living-donor liver transplants, which use only a portion of a donor's liver to replace the recipient's diseased organ, eliminate the need for patients to wait for a cadaver donor. This is crucial, considering nearly 2,100 patients nationwide currently are on waiting lists for liver transplants. More than 500 of them will die this year while waiting for organs to become available from donors who die in automobile accidents or other traumatic events.

Emond comes to UCSF from the University of Chicago, where he helped develop living-donor liver transplants. His arrival will make UCSF the only transplant center in the country with a living-donor liver transplant program.

Only two other institutions in the world — one in Japan and one in Germany — have programs offering the procedure.

Emond expects donation by family members to become the source of organs for a significant number of liver transplant patients in the future. The procedure is performed only if the donor and recipient are related, decreasing the chances of rejection.

Recipients of living related-donor liver transplants reject the organs half as often as recipients of livers from cadaver donors, according to Emond.

The first living-donor liver transplant took place in 1989. Emond estimates fewer than 100 of the procedures now have been performed worldwide. All of the recipients to date have been children, for whom it is particularly difficult to find donor organs small enough for transplantation.

Emond initially will perform pediatric transplants at UCSF, but he plans to expand the program within a year to include adult recipients.

In cases involving a large donor and small recipient, the adult procedure would remain similar to those already performed involving parent donors and child recipients. In these cases, surgeons will remove about a quarter of a donor's liver and use the segment to replace the recipient's diseased organ.

In cases involving adults of equal physical stature, surgeons will perform "auxiliary transplants" in which a segment of a donor's liver is removed and transplanted alongside the recipient's diseased, but still functioning, organ.

"We place the donor liver on the side of the existing liver," Emond explains. "This creates a competition between the two that the healthy liver segment will win. The diseased liver will shrink and become non-functioning."

Living-donor liver transplants are possible because of the liver's unique ability to regenerate. The portion of an adult donor's liver transplanted into a child is able to function and grow as the child grows. The relatively small segment of a liver transplanted into an adult will be able to grow to a normal size relatively quickly, says Emond.

No other organ in the body has this ability to grow or reduce in size as needed.

Taking a segment of the liver removes a portion of its capacity but none of the functions it performs. Because people are able to live with as little as 15 percent of normal liver capacity, transplanting a relatively small segment causes no permanent problem for the donor and is sufficient to sustain the recipient until it grows to normal size.

Emond

Emond served most recently as director of liver transplantation and hepatobiliary surgery at the University of Chicago, Pritzker School of Medicine. He is a graduate of the Pritzker School of Medicine and completed research fellowships at Universite de Paris Sud in Villejuif, France, and the Pritzker School of Medicine.

New Women's HIV Clinic Opens July 1

With the assistance of a grant from the Ryan White Foundation, the ACC's AIDS clinics will add a new service: a practice devoted specifically to women with HIV. This will be the first such practice in the Bay Area.

About 10% of the caseload in the AIDS clinic are women, says nurse practitioner Cecily Cosby, administrative nurse for the clinic. Currently, this translates to about 50 women in 500 patients, but it's a percentage that's growing. The women represent all risk groups, she says, from IV drug users to those with heterosexual partners with AIDS.

The clinic directors, including Harry Hollander and infectious disease specialist Ruth Greenblatt, as well as Cosby, recognized that for many women with HIV, the traditional AIDS clinic doesn't meet all their needs. Many of these women have child-bearing concerns or are responsible for raising children. There are special needs for gynecologic care, counseling and child care. Also, some women feel uncomfortable in a clinic waiting room populated mostly by male patients.

Thus, the new clinic, in addition to providing complete primary care for HIV infection, will offer counseling in regard to contraception, sexual practices, and social, family and financial concerns; support groups; routine gynecologic exams as well as specific services, such as treatment of vaginal infections; breast exams; free child care and interpreter services.

"Just coming to the clinic at a time when they can see other women and talk to others in their situation will be a help," says Cosby.

The clinic officially begins July 1, when the grant comes through. At that time a consulting gynecologist, part-time social worker and nurse practitioner will come on board to support the anticipated increase in the workload.

Meanwhile, a Wednesday morning time slot already has been carved out for the women's clinic and patients are being seen. The clinic shares space with — and the staff of — the existing AIDS clinic.

Referrals are welcomed, says Cosby. They are especially interested in reaching underserved women. For further information, call 476-3226.

Gene Tartaglia (third from left) surrounded by fellow Rose Runners

Hail, the Rose Runners!

One evening a month a small band of people bearing large amounts of roses descends upon the HIV ward at Mount Zion for the "J.D. Hicks Rose Run."

The group arrives with buckets of roses of all colors, forms an assembly line, and makes huge bouquets to present to patients throughout the unit.

The Rose Runners are the good friends of the late J.D. Hicks, a San Francisco policeman who was hospitalized at Mount Zion before his death last October.

Gene Tartaglia, who was J.D.'s partner, relates that J.D. was a lover of roses and had a large garden of his own. Gene and several friends — including a florist — thought up the Rose Run as a way to perpetuate his memory. The group distributes the bouquets at Ralph K. Davies as well.

More than $18,000 in memorial gifts also were donated to the ward following J.D.'s death. The funds were designated to the nursing staff for equipment or other purchases to enhance patient care. Gene hopes to perpetutate the gift through future fundraising activities.

Affirmative Action Nursing Scholarship

Applications for the Department of Nursing's Affirmative Action Scholarship Program are due in the Nursing Education Office before Saturday, August 15.

The program provides financial support for minority staff members who are enrolled in a nursing program. The scholarship program is part of an effort to achieve a more ethnically diverse staff, in keeping with UCSF's increasingly diverse patient population.

There is no specified amount of the scholarship. Funds will be granted according to need. Critieria include applicant's willingness to commit to continued employment at UCSF for at least the amount of time supported by the scholarship. For information, call 476-2993.
